

PROSTAR CAMERA POLE SPECIFICATIONS

- The ProStar Pole Camera is one of the many camera solutions designed by our staff to meet the client's specific needs.
- All ProStar cameras can be operated from battery or live power from pole taps.
- Internet connections are available so the customer can view a camera from around the block or around the world - at any computer.
- Available features include night vision; pan, tilt, zoom; infrared illumination; color or black and white recording; fixed or swivel mounting brackets.
- One of the above enclosures can house up to four cameras for multi-angle footage.
- H264 video recording format is available.
- The entire line of ProStar cameras come with a full satisfaction guarantee and are custom designed to fit your personal application.
